

Data Engineer

As a Data Engineer you will be working in a small, cross-functional team that delivers reports, dashboards and ad hoc data analysis to our business users and customers based on our internal self-service BI solution. You will work with a modern streaming-first Big Data platform based on Apache Kafka, Apache Flink, PostgreSQL, Apache Druid, and Jasper Reports.

Role description:

- Build SQL queries for loading data from Data Warehouse into reports and dashboards based on business requirements
- Analyze cases of missing or wrong data in Reports, Dashboards and Data Warehouse
- Maintain data in Data Warehouse and perform regular administration work to ensure stable monthly reporting procedures
- Support users in the interpretation of data and active participation in improving data quality

Qualifications:

- Studies in computer science/business informatics or a comparable IT background
- Experience in the field of data analysis/engineering and working with databases in a Data Warehouse
- Good skills in writing SQL queries to load data and prepare them for visualization reports and dashboards
- Knowledge of building ETL pipelines and integration of data into a Data Warehouse
- Programming skills especially in Python and in context of data retrieval and transformation are favorable
- Confident communication skills English

What we can offer you:

- Team spirit and a passion for information technology
- Professional and personal development. Budget for training opportunities, seminars, mentoring and internal training for shaping and realizing your career goals
- Working in an Agile environment
- Flexibility in work schedule
- Competitive salary and performance-based bonuses
- Great work-life balance
- Team building events, pizza breaks, cinema nights and special occasion celebrations
- Well-located offices close to Thessaloniki's city center

Who we are: noris is a high-tech company specialized in IT. It was founded in 2016 in Thessaloniki and it is a subsidiary of noris network AG, which has over 30 years of experience in IT technologies in Germany. The company provides customized IT solutions in the areas of IT outsourcing, Cloud Services and Network & Security. Technological basis of these services is a powerful IT infrastructure that relies on noris network's own high-performance backbone and multiple high-security data centers which are located in Nuremberg and Munich.

Our mission: Modernizing and securing IT Infrastructure

Our vision is to become the best provider for modern & high security IT services

We look forward to receiving your application (with earliest possible entry date), ideally via email.

We will be happy to help you with further questions.
