

## Senior Software Engineer Data Analytics (f/m/d)

If you appreciate personal responsibility and short decision-making processes and also you are looking for new challenges, then noris is for you!

### Your role:

- Design solutions for data marts, reports, data-intensive applications, and associated ETL logic together with subject matter experts and BigData architects.
- Multidimensional data modeling as part of the expansion of our core data warehouse (Star Schema, Data Vault, etc.).
- Development of data visualization and reporting products for noris Services in an international, interdisciplinary, agile and autonomous team
- Analysis of data domains
- Work with and further develop a modern streaming-first BigData platform based on Apache Kafka, Apache Flink, PostgreSQL, Apache Druid, Jasper Reports.

### Your profile:

- Completed studies in computer science or a comparable qualification.
- Very good knowledge in building, optimizing and further developing datamarts and relational database query languages e.g. SQL.
- Sound knowledge of BI front-end tools, ideally Jasper Reports or Metabase
- Experience in scripting & programming languages (e.g. Python, Scala)
- Ideally knowledge in stream-based Big Data platforms with Kafka, Apache Flink or similar.
- Very good knowledge of English, both written and spoken

### The following would be desirable as well:

- Certain background in software development
- Good oral and writing skills in German

### What noris can offer you:

- Team spirit and a passion for information technology
- Professional and personal development. Budget for training opportunities, seminars, mentoring and internal training for shaping and realizing your career goals
- Flexibility in work schedule
- Competitive salary and performance-based bonuses
- Great work-life balance
- Team building events, pizza breaks, cinema nights and special occasion celebrations
- Well-located offices close to Thessaloniki's city center
