

Software Engineer

As an employee in our agile team you develop our modern enterprise-wide information systems, which integrate all business relevant tools and systems around our CMDB. The focus of your field of activity lies in the backend of these systems that we implement in Perl. Are you experienced in designing and implementing complex software systems and looking for a new challenge? Then noris has the job for you!

Your role:

- Develop and optimize highly available Software with modern methods
- Analyse problems and solve interference
- Design, test, document and maintain web applications and APIs
- Develop custom solutions for our customers
- Work using project management methods like Scrum as part of an agile team.

Your profile:

- You have solid experience in the development of software in Perl
- You are familiar with Technologies like REST, Continuous Integration / Deployment, Docker, Git and can thus support us in these areas
- Experience with Linux Operating Systems
- Python knowledge would be an asset
- A high level of teamwork and communication skills, independent, structured and solution-oriented work, engagement and a high readiness for action and willingness to learn will complete your profile
- Excellent organizing, prioritizing and multitasking abilities
- Excellent written and spoken English

The following would be desirable as well:

- Good oral and writing skills in German

What we can offer you:

- Team spirit and a passion for information technology
- Professional and personal development. Budget for training opportunities, seminars, mentoring and internal training for shaping and realizing your career goals
- Flexibility in work schedule
- Competitive salary and performance-based bonuses
- Great work-life balance
- Team building events, pizza breaks, cinema nights and special occasion celebrations
- Well-located offices close to Thessaloniki's city center
